FullStack Developer

PROFILE

Solutions Senior Leader handling a department of over 10 specialists dedicated to providing Services and Solutions of ITSM, IT Sec, Web Security, and API integrations with JavaScript and Python.

Experienced Web Developer adept in all stages of advanced web development. Proficient in various technologies, including JavaScript, CSS, HTML, SQL, MongoDB, and Libraries like React also Back-end Development with Node. Able to effectively self-manage during independent projects and collaborate in a team setting. Working with APIs either building them or using them to build my own projects and also building integrations between software platforms using webhooks or custom JavaScript functions.

Amongst my greatest skills, I have a great capacity for understanding new ideas and concepts quickly, this allows me to apply the practical training and any other knowledge I learn during any induction or workshop you have available.

Freshworks SA – Freshworks

*SA: System Administrator
*CSA: Certified System Administrator

ABOUT ME

I'm always willing to learn something new and I have the ability for understanding new ideas and concepts quickly. I've also found that no matter how hard the topic is if you study every day, you will understand it. I love the quote "Remember to keep striving for progress over perfection, and a little progress every day will go a long way" sometimes is easy to forget what we have accomplished because we are always looking into the future and I like to remind myself that no matter how much I don't know yet if I keep moving forward I will get there.
